➤ Problems with your MRO valve supply?

You will probably have hundreds of different valves in your industrial process and perhaps a few different sites with local purchasing and warehouse. Installed based in plant different from site to site on similar product families.

All these facts together can lead to sluggish and inefficient purchasing procedures.

➤ SAIDI OUTSOURCING is the solution!

Just focus on your core business, leave valves to the **valve specialist** (best-in-class-products, wide product range, ex-stock, close to the customer, technical assistance, FAT, SAT...), **reducing your TCO** (Total cost of ownership).
